Application Developer

Engineering a high quality, stable and scalable application by integrating the necessary technologies

Results-focused, analytical and self-trained Application Developer with 10+ years of experience developing applications and software for inclusion into the company's product offerings including mobile. Methodical technical team player with ability to write clean code for sustaining market relevancy. Possesses a strong technical prowess encompassing computer science and programming. Astute and complex thinker that takes a methodical, consultative approach when determining the best solutions for the customer. Solutions-oriented problem solutions expert seeking to leverage background into a remote senior application developer role for a progressive organization.

Core Competencies:

Mobile Application Development | Full-Stack Development | Application Development | Performance Testing | Mainframe to Web App Data Conversion & Loading | Configuration Management | Continuous Integration | Version Control | Testing & Document Management | Software Development Life Cycle (SDLC) | Client Solutions Delivery | Infrastructure Automation | Cross-Functional Communications | Team Leadership | Stakeholder Presentations | QA

Key Contributions

- Exhibits excellent coding skills and offers extensive expertise in software/application development.
- Strong ability to lead teams and ensure project deliverables are administered on time; specifically, monitors coding activities as per business requirements to ensure the team is following proper standards.
- Recognized as a quick learner and detail-oriented professional who also understands the bigger picture; demonstrates solid domain knowledge to support highly visible application development project creation.
- Designs and utilizes AWS Serverless Architecture or Hardware As a Service to increase application resilience and performance.
- Demonstrated ability to work extensively on both the client side and the server side of technologies; highly adept at recommending business process improvements and advancing shared organizational goals.
- Develops and engineers applications and solutions that fuel operational improvements and profitability.

Professional Experience

Conversion Developer | Tyler Technologies | 2019-Present

Designed scripts and tools to convert data structures into an Incode 10-consumable. Ensured customer satisfaction/retention by timely offering proactive resolutions to questions, concerns, or challenges. Supported projects throughout the entire life cycle, including updating stakeholders.

Mobile Software Engineer/Lead Full-Stack Developer | CUC Software | 2015-2019

Developed and maintained mobile product, managed office servers, cloud servers and networking systems. Drove productivity by presenting action plans, providing level 3 help desk support, training teams on systems functionality, creating video documentation, managing projects/teams, and maintaining intern education and growth initiatives.

Systems Administrator/Full-Stack Developer (Remote) | Grassfire Nation | 2013-2015

Developed customer engagement tools, integrated API's, installed WordPress and maintained servers with caching and horizontal scalability on AWS. Implemented ad campaigns to increase advertising revenue and brand awareness.

Junior Programmer/Level 3 Help Desk Support | Teen Mania Ministries International | 2012

Designed and implemented new software solutions, and maintained legacy and in-house software (CRM, financial, intranet, registration systems, reporting). Administered web and virtualization servers, source control, QC, and authorization. Mentored, coached, developed and supervised development staff and interns for optimal performance and software standard compliance. Directed customer service and help desk tickets through streamlined resolution.
